GEORGE CLARKE

OUR HERITAGE

FOUNDED IN 1958

Truedor is a range of strong, long lasting and affordable GRP composite doors. We choose to work with this material because it won't warp or split and can be made to look like timber but with none of the disadvantages. GRP composite is robust and delivers the same aesthetic appeal as timber. Why use anything else? Across all our collections, our quality front door styles can be coloured and finished to your personal specification.

Our fully trained technical engineers take great pride in every doorset produced in our factory and are trusted to ensure that nothing leaves the premises without meeting strict quality criteria and undergoing thorough testing.

IG was founded in South Wales in 1958 and composite door production began in 1979, since then we have been supplying an extensive range of high performance external door sets from our manufacturing facility in Cwmbran.

With a turnover in excess of £25m, we employ over 180 people and are one of the largest manufacturers of composite doors in the UK, producing in excess of 2000 sets per week.

Ongoing investment in our manufacturing processes will continue to spearhead our growth.

We continue to be industry leaders by providing a flexible and cost effective product range backed by our exemplary service record and years of experience.

We have the confidence to offer all our standard GRP composite doors with a ten year manufacturers guarantee... but when you have been in the business as long as we have, our products come with far more... they are backed by our enviable reputation.

HARMONY GLASS RANGE

Making these doors even more special is the fact that each decorative glass panel has been hand crafted with coloured bevels to complement the door.

HARMONY COLOURS

DECORATIVE GLAZING OPTIONS AVAILABLE GLAZING

Clear option available for use with any other door colour.
All these designs feature an obscure stippolyte style pattern for easy matching sidelights and toplights.

NOTES
❖ Matching sidepanels available. See page 51 for more details.

Truedor

**GEORGE CLARKE —
INTRODUCES THE TRADITIONAL RANGE**

**TRADITIONAL
—YET
PROGRESSIVE**

GLAZING IS A KEY FEATURE TO ANY FRONT DOOR, AND THE TRUEDOR RANGE OF TRADITIONAL DOORS IS NO EXCEPTION. IT HAS A VAST ARRAY OF GLAZING OPTIONS TO SUIT EACH DOOR STYLE.

FROM AFTERNOON TEA TO CRICKET ON THE VILLAGE GREEN, SOME BRITISH TRADITIONS ARE HARD TO BEAT.

This is because they have stood the test of time and come to represent an expression of ourselves.

There is something of the traditionalist in all of us, as we celebrate the strengths of British culture such as art, design and manufacturing in the furnishing of our homes. Crafted in Britain, all our Traditional doors are finished to perfection, whatever the specification. From the style and colour to the use of glazing and fixtures, you can select from an impressive array of options to create your own bespoke door.

Knowing where to start in choosing the right door for you can be a daunting prospect, but with Truedor, it's easy.

The Truedor online door designer is a step-by-step guide to the various feature combinations available. First choose a door style, then play with different glazing and colour selections until you find the best look for your home. The online designer then enables you to view your preferred door on an image of your own home.

The different door styles in the Traditional range marry timeless elegance and classic design. From the beautifully understated, four panel Cezanne to the striking and robust Rembrandt, these versatile doors suit a wide variety of house types and residential environments.

The Traditional range proves ever popular - with the largest number of style options, it offers something for everyone. But Traditional doesn't need to mean old fashioned and from Truedor it genuinely means you are getting the very best of British.

“Whether you live on a Victorian terrace or a modern development, your home is as individual as you are and deserves a facade that makes a unique statement. By choosing a modern, composite door you can benefit from a wide variety of styles, sizes, colours, glazing and fixtures. Exploring the available options gives you fresh ideas and ensures that you arrive at a front door that is highly personalised and a complete reflection of your tastes.”

Yours Truly

George Clarke

TRADITIONAL RANGE

CEZANNE

With five styles, a great number of glazing options and colour choices, the four panel Cezanne makes a smart addition to any home.

**GEORGE CLARKE —
INTRODUCES THE COTTAGE RANGE**

THE COTTAGE RANGE — STYLE WITH SUBSTANCE

COTTAGE DOORS OF YESTERYEAR WERE MADE OF TIMBER, MEANING THAT OVER TIME THEY WOULD CHANGE SHAPE AND BECOME DRAUGHTY. GRP COMPOSITE IS AVAILABLE IN WOODGRAIN WHICH DELIVERS A NATURAL WOOD EFFECT FOR ADDED AUTHENTICITY YET WILL NOT DETERIORATE LIKE TIMBER.

A LITTLE PIECE OF THE COUNTRYSIDE IN ANY SETTING

Country cottages are renowned for oozing charm whilst affording a warm welcome and an escape from the most inclement weather. From their flagstone floors and cast iron fireplaces through to their tightly thatched roofs and sturdy garden gates, the typical British cottage is a safe haven and a byword for expert craftsmanship.

Great care must be taken in restoring and maintaining cottages to retain their unique nature, with owners becoming the custodians of their past and future. Salvage yards can be a gold mine of reclaimed fittings and furnishings such as Victorian radiators and aged railway sleepers.

But finding entire sets of matching windows or original front doors of any quality is practically impossible.

With the Cottage range, Truedor makes it possible to put a totally modern door on to any character property in both urban and rural environments. The Turner door is available in several different styles; choose from our wide variety of standard, colours, heritage colours, and wood stains along with a great choice of glazing options. It is finished with a classic 'tongue and groove' appearance, reminiscent of a sturdy and purposeful farmhouse door.

The Cottage range bring a sense of the countryside to any home and with a solid wood-look finish, delivers substance without losing any of the style.

“Character properties are perennially popular among home buyers who are looking for a piece of history. These period houses usually offer several original features which their owners seek to preserve. Even when looking to renovate or improve these homes, attention to detail is key, so modern fixtures with heritage overtones are the ideal solution.”

Yours Truly

George Clarke

TURNER

Available in a variety of styles, with a great choice of glazing options, the Turner has a 'tongue and groove' effect which is reminiscent of a farmhouse door. It brings a distinct rural feel to any property.

INTRODUCES THE CONTEMPORARY RANGE**

THE CONTEMPORARY RANGE — FOR A TRULY MODERN DOOR

**SIDE AND TOP PANELS
SURROUNDING YOUR DOOR
FRAME CAN COMPLEMENT
A CONTEMPORARY DOOR
STYLE. THEY ALLOW MORE
LIGHT INTO THE HALLWAY
AND WORK TO MAXIMISE
THE EFFECT OF MODERN
GLAZING FEATURES.**

A CONTEMPORARY DOOR FROM MODERN MATERIALS

Your front door provides the best security for your castle. It protects you from the extremes of British weather and should offer true durability. Choosing a new front door is a decision you may only make once in your home and you need to make it with confidence.

Every door in the Truedor range is made from GRP composite – a high impact glass-reinforced polymer. This material is strong, long-lasting and affordable. Aside from those benefits, there are many practical reasons why we choose to work with it. GRP composite won't warp or split and can combine traditional wood aesthetics with low maintenance technology. With none of the disadvantages of timber but the same aesthetic appeal, why would we use anything else?

Across the exquisite Mondrian and Goya collections in the Truedor Contemporary range, there are several smart door styles to choose from. With an emphasis on geometric glazing, these strikingly modern doors make the right first impression, every time.

If a Contemporary door style feels like a radical departure for you, try the Truedor online door designer to test out the Mondrian and Goya in different colours. Add one of the many different glazing options that are available to see how, with your own personal touch, a Contemporary door can suit most homes.

“ There has been a significant number of new homes built over the last 50 years. Often, these more modern houses need doors and windows that are in keeping with the surrounding architecture. There is an increasing number of exciting, contemporary doors and other fixtures available to homeowners looking to give their post-war house a clean, fresh look. These ultra new door styles provide instant sophistication to a home. ”

Yours Truly

George Clarke

CONTEMPORARY RANGE

MONDRIAN

With a selection of smart styles to choose from, the Mondrian is the definition of modernity. This door makes a focal point of its stunning geometric glazing, providing even more kerb appeal for your home.

HARDWARE & ACCESSORIES

TRULY SECURE DOORS – WE TAKE YOUR SAFETY SERIOUSLY

We feature fully suited hardware as standard. Our door handle is an attractive looking product, which offers an ergonomic design with no compromise on grip length. The handle has been manufactured to an extremely high standard with outstanding product performance.

The letterplate has been designed very much with aesthetics in mind with its simple but elegant styling, designed to complement any door and suited finishes with other door furniture. The construction is unique with pressed metal flaps that shroud the surround from view.

The door knockers, numerals, eyeviewer and lettering have been sensitively designed to complement the features of any external door face. Manufactured from 304 stainless steel (with the exception of the eyeviewer which is brass), the products offer ultimate corrosion resistance for ultimate performance.

GUARANTEES - PEACE OF MIND GUARANTEED

Not only will your personalised door arrive in as little as 5 days, but once fitted, the doorset is guaranteed for up to ten years, depending on the finish and paint selected.

SECURITY AS STANDARD

STANDARD SPECIFICATION INCLUDES:

- 2 SETS OF TRIPLE DOGBOLTS
- TROJAN HARDWARE
- ERA MULTI POINT LOCKING SYSTEM

Our doors are fitted with high security multi-point locking systems as standard. These locks meet the requirements of PAS 23/24 and are tested in accordance with BS EN ISO 9001 Quality Assurance. We also supply a 'split spindle' option which further enhances security. The door locks on the latch as soon as the door is shut and requires a key to unlock it.

To take the security of our doors to an even higher level, we also fit our specially designed triple dogbolt system as standard. This involves two sets of triple hinge bolts that secure the door to the frame, protecting you against intruders. Through our design we aim to make fitting composite doors easier.

George Clarke

GEORGE CLARKE

TRIPLE DOGBOLTS

- 2 sets of triple dogbolts supplied as standard on all Truedor composite doors
- Designed to complement our existing high security multi-point lock
- Exclusive to Truedor

WINKHAUS AV2 MULTIPOINT AUTOLOCK

Designed to provide homeowners with instant security by automatically engaging two solid high-tensile steel hooks and central latch every time the door is shut.

WINKHAUS THUNDERBOLT HERITAGE LOCK

Designed to complement our traditional or modern doors featuring shoulder height locking.

DESIGN YOUR OWN TRUEDOR AND SEE IT ON YOUR OWN HOME

BESPOKE COLOURS

Our mixing system allows a choice of colour options from the RAL colour range.

NOTE: We have faithfully reproduced the colour ranges featured, there may be variations from print to the actual product.

Our composite door designs are available in a range of five standard colours and two woodstain finishes, but with our high specification paint plant, we can provide a wide range of specialist colours and a colour matching service. This state-of-the-art mixing system allows a choice of colour options from the popular RAL colour range – it's a veritable rainbow and means there is a colour for everyone.

Personalising your composite exterior door from Truedor doesn't end with the style, colour and finish. There is an extensive range of high quality accessories to choose from to suit the overall look of your home. Our corrosion resistant handles, letterplates, knockers, numerals and eyeviewers have been manufactured to an extremely high standard of performance.

TRIED AND TESTED FIRE PROTECTION

THE TRUEDOR FIRE DOOR RANGE IS COMPREHENSIVE AND PROVIDES SOLUTIONS FOR THE MAJORITY OF FIRE DOOR SITUATIONS REQUIRED BY HOUSEBUILDERS AND REFURBISHMENT PROJECTS.

Truedor Fire Doors are tested by independent fire laboratories and are available with a range of ironmongery options. Our Fire Doors have been tested to meet the requirements for a 30 minute fire resistance (FD30S) as required for flat entrance doors and most other fire door situations.

Truedor Fire Doors are available in a range of PVCu or softwood frames as pre-hung units complete with intumescent fire seals, smoke seals and sound seals to meet Approved Documents B&E of the Building Regulations.

FEATURES AND BENEFITS

- Available primed for on-site painting or prefinished in a choice of five standard colours.
- Meet Secured by Design standards.
- Durable construction that does not warp, bow or split.
- Excellent sound and thermal performance.
- Acoustic seals to meet Part E of Building Regulations.
- GRP Fibrecolour variants available in Jet Black, Steel Blue, Pine Green, Signal Red and Traffic White.
- Glazed options available.

IRONMONGERY

- Multipoint locking system.
- Euro profile key/thumb-turn cylinder.
- Steel butt hinges as standard.

ADDITIONAL ITEMS

- 180° eye viewer.
- Fire rated letterplate.
- Door chain.

SELF-CLOSING OPTIONS

- Concealed door closer.
- Overhead door closer.

Overhead Closer detail timber frame

Overhead Closer detail PVCu frame

Minimum frame head depth required for fitting of overhead closer.

TRUEDOR FIRE DOOR STYLES

GRP Fire Door range shown.

FIRE RESISTANT GLAZING

Fire resistant glass is available as a double glazed unit with the inside pane laminated and the external pane in Pilkington Pyroshield2 Georgian wire glass (rating E30).

Where obscure glass is required then the laminated panel is supplied as stipplyte obscure.

Overhead Closer

SELF CLOSING DEVICES

Fire doors are usually required to have self closing devices fitted. Truedor recommends the use of overhead type controlled closers to EN 1154 for this purpose. The closers used are rated for the weight and size of the doors supplied.

Jamb type concealed closers can be supplied on request but IG Doors accepts no responsibility for the ability of this type of device to fully close a door.

The ability of any closer to close a door is dependent on the free movement of air on both the opening side and closing side of the door.

Overhead closers require a minimum of 30mm fixing space at the head of the frame and also clearance at the reveal to allow the door to open to 90°. Please ensure your build detail allows sufficient space.

★ Some designs also available in Steel on request. Please contact the Technical Department if you require further advice or information.

DOOR FEATURES

Manufactured in Britain with the utmost attention to detail, each Truedor product is tested to the highest recognised standards of fire and weather-resistance, draught exclusion and security capability. It is a high performance door because it is formed from GRP composite (high impact glass-reinforced polymer), combining traditional wood aesthetics with low maintenance technology. In fact, apart from the occasional wipe down with warm soapy water, you can simply enjoy your great-looking door every day.

Truly amazing.

TRULY SECURE

Our doors are fitted with high security multi-point locking systems as standard. These locks meet the requirements of BS6375 / PAS 24 and are tested in accordance with BS EN ISO 9001 Quality Assurance. To take the security of our doors to an even higher level, we also fit our specially designed dog bolt system as standard. This involves two sets of triple hinge bolts that secure the door to the frame, protecting you against intruders. In our design, we also aim to make fitting composite doors easier.

We also supply a 'split spindle' option which further enhances security. The door locks on the latch as soon as the door is shut and requires a key to unlock it from the outside. We can also offer other door furniture as an alternative if required.

TRULY FRIENDLY TO THE ENVIRONMENT

IG Doors, the company behind Truedor, recognises its important role in conserving the environment for future generations and aims to minimise its impact on the environment. In particular, the company gives attention to the following areas of activity:

- Achieving full compliance with all relevant legislation and regulations
- Minimising resource consumption and waste generation through the efficient use of raw materials, as far as commercial opportunities allow
- Recycling will be actively encouraged where technically feasible
- Improving energy and utilities usage through sound management practice
- Increasing the use of sustainable materials where possible, with particular emphasis on timber elements.

Through its sustainable waste management policy, IG Doors has reduced its consumption of materials, encourages re-use and recycling and the use of recycled materials. The company currently recycles almost all of the following materials: PVC and timber offcuts, sawdust, mixed scrap metal, cardboard, paper, polythene and ink cartridges.

Look for the name - every door will be marked with the name on the hinge edge - your assurance of compliance with the Standard.

TRULY EXTENSIVE RANGE

In our 35 years of manufacturing doorsets we have built up a full range of products that are now available to the trade.

These include:

- FIRE DOORS
- SECURED BY DESIGN DOORS
- STEEL FACED DOORS
- COMMUNAL ENTRANCE DOORS
- TIMBER FRAMED DOORSETS
- PRIMED DOORS

FOR FABRICATORS

With our state of the art CNC machines we can provide **PREPPED SLABS** for fabricators to hang in their own frames.
